Special projects

Project support

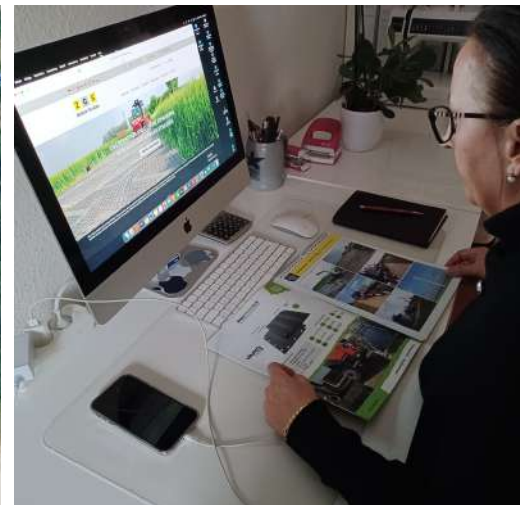

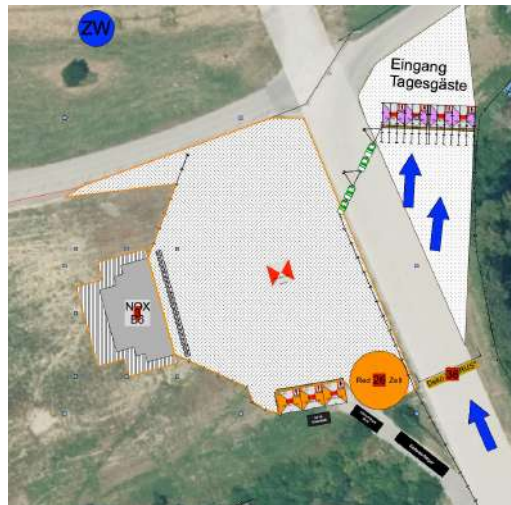

Tailor-made and flexible

Trust in the competence and experience of our team when planning your building projects. We offer a full range of services for short-term or long-term rentals, from preliminary construction site inspections to planning and implementation. Our team will be on hand to provide you with advice and support from the first to the last step. Thanks to our network and our partners we offer you quality at the best prices.

Technical consulting

Do you need support for your building project? We offer the solution.

- Planning, feasibility analysis, approval procedures, tenders
- Infrastructure from warehouse to material
- shipment
- Staff for assembly and dismantling
- Planning, implementation and execution of your projects
- Coordination of all trades
- controlling
- postprocessing

Projekt-PLANUNG / CAD

Professionell und maßgeschneidert für Ihr Projekt

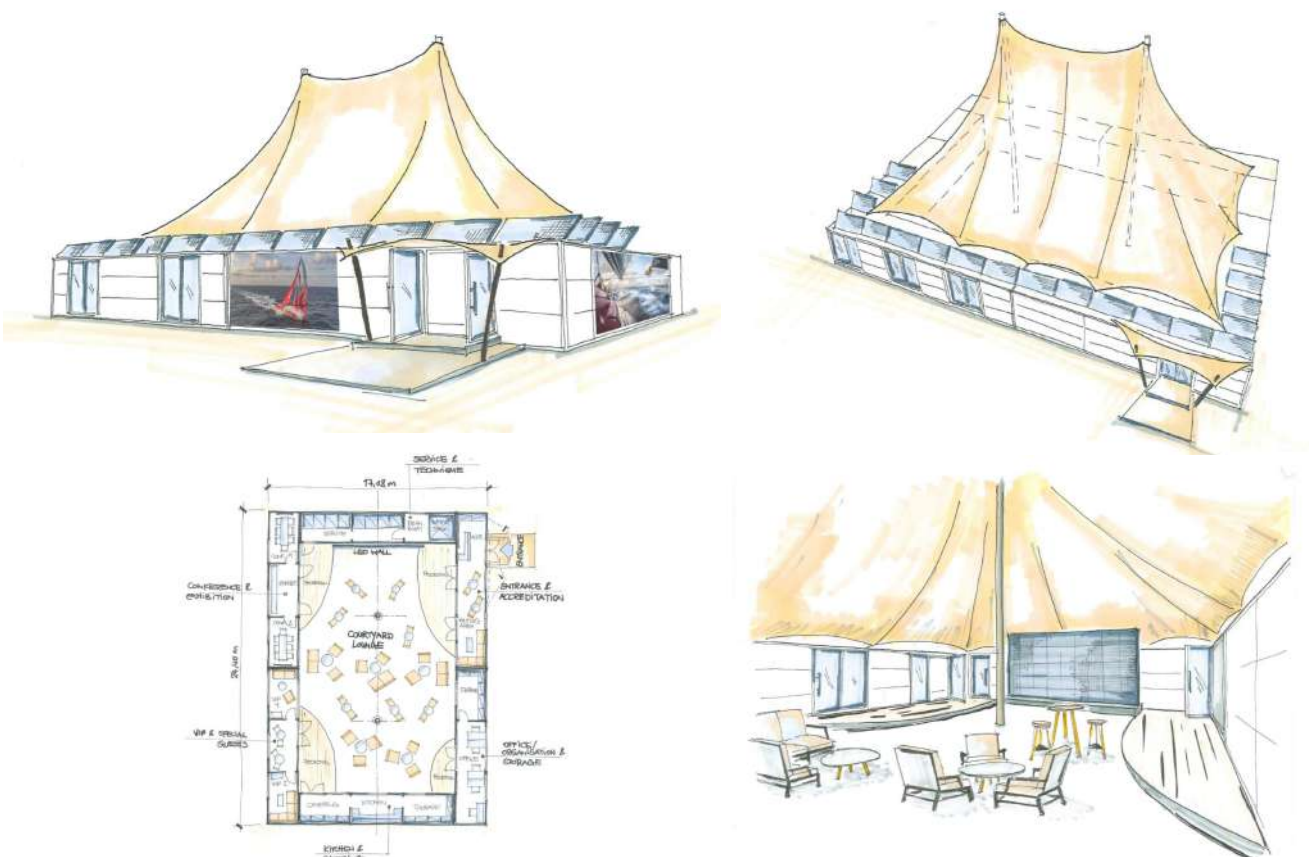

Eine CAD-Zeichnung und Projektplanung gehört in der Branche zum ersten Schritt für Ihr Projekt. Denn eine detaillierte Zeichnung ist nicht nur wichtig, um Venue-Kapazitäten zu ermitteln, sie ist grundlegend für die Budgetierung und Finanzierung des Projektes.

Wir machen das für Sie!

PROFESSIONELLE CAD-ZEICHNUNG

Eine CAD-Planung ist grundlegend und unverzichtbar für alle Bereiche:

Von der Idee über die Planung bis zur Durchführung des Projektes. Unsere Architekten, CAD-Planer und Veranstaltungsprofis stehen Ihnen zur Seite. Auf Wunsch übernehmen wir auch das gesamte Projektmanagement Ihrer Veranstaltung.

Material renting

Reliable and innovative

In the area of access solutions, no wish remains unfulfilled. Our products and the temporary infrastructure speak for itself and provide the right solution for every project.

We also offer you every product for rent, so that your building project is a success and you always have firm ground under your feet with our mobile construction roads. We have the know-how, materials, storage, infrastructure and commitment to ensure that your project is completed on schedule. Whatever you do, with us you are always on safe ground.

Assembly staff

Application possibilities

The assembly and dismantling of any event or construction project requires a fast working and flexible assembly team.

This is the only way to save costs effectively when using resources. Our multi-lingual and experienced employees have the necessary know-how and many years of experience to set up and dismantle your project in compliance with all regulations and standards.

Service

From simple assembly assistants, through experienced forklift truck drivers to project supervisors, we offer you the qualified staff you need for your project from an experienced pool of personnel throughout Europe. From cleaning and maintenance of your material, through transport to assembly or project support. We are your contact for every area.

Offers

Our personnel offers can be obtained from our partner within the framework of temporary employment or directly from us as a factory service. On an hourly, daily or project-related basis.

Cable canal

Cable Protectors protect cables. Moreover, they create areas that are easy to walk and drive over. These can secure events, construction sites, and more. Cable Protectors protect in two ways. First, they guide cables and hoses of various designs across the terrain in orderly paths and cover them securely. Secondly, this type of covering opens up edge-free areas for pedestrians and vehicles alike. You can walk and drive over these areas without any problems.

Load handling attachment

Load capacity, 4 pc each: 500kg
Load capacity, 1 pc each: 170kg
This load handling attachment is compulsory for the following models:

varioMAT 3
varioMAT TT

Load handling attachment

Load capacity, 4 pc each: 500kg
Load capacity, 1 pc each: 170kg
This load handling attachment is compulsory for the following models:

varioMAT F
varioMAT 4

Stanchion rack

Stanchion pallets are flexible storage systems. They hold 25 panels and are suitable for the following models:

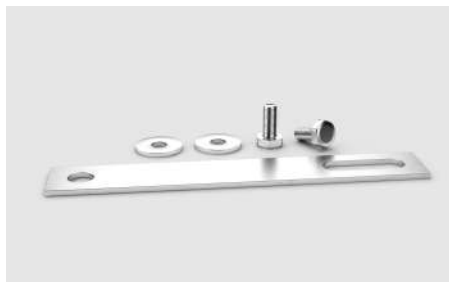

varioMAT 1+
varioMAT 2
varioMAT basic

Screws and washers

Commercially available screws are used with all products.

varioMAT 1+, varioMAT 1
= M10

**varioMAT 2, varioMAT 3, varioMAT F,
varioMAT 4, varioMAT TT**
= M16

Metal connectors (universal)

Metal connectors are used to bolt ground protection panels together. They are suitable for the following products:

varioMAT 3
varioMAT F
varioMAT TT

Metal connectors (2-fold)

The ground protection panels are connected with the new, all-metal 2-fold connectors and M10 screws. The connectors are suitable for the following products:

varioMAT 1+
varioMAT 1

varioMAT 2 – Ramp, top

Mounting “on” the overlap edge.

900 mm length

1900 mm length

varioMAT 2 – Ramp, bottom

Mounting “under” the overlap edge.

900 mm length

1900 mm length

varioMAT 3 – Ramp

2000 mm length

with 3 eyelets for bolting

3000 mm length

with 4 eyelets for bolting

Instructions for use

Please refer to the associated instructions for use when using the products.

Additional material required for installation.

To be able to lay the ground protection panels, you need a load lifting device, as well as a four-strand chain hanger. These are attached to the forks of the forklift truck in order to lay the panels.

Installation service

As an alternative to self-installation, we provide an installation service with our installation teams. Our trained teams, who are constantly working with the products, will professionally install the panels for you on request.

Additional equipment needed for assembling.

To bolt the panels together, you will need an impact wrench with a suitable screw attachment to connect the metal connectors to the M16 screws and the panel.

Technical data for the varioMAT series

Material: polyethylene, high molecular weight

Melting point: 135 – 140 °C

Ignition temperature: > 330 °C

According to ISO 11359, the material is subject to a coefficient of linear thermal expansion of approx.

0.2 mm per 1000 mm length per 1 °C.

Flammability (self-classification) DIN 4102: Class B2

Flammability (self-classification) UL 94: Class HB

Very good wear and impact resistance, even at warm and very cold (-50 °C) temperatures.

The high proportion of regenerated high and ultra-high molecular weight polyethylene makes the vario series ecologically and qualitatively very valuable.

References since 2010 in the fields of: Oil & Gas, Construction, Heavylift, Wind Farms, Events & Concerts and Overhead Line Construction.

Features

The varioMAT panels are bolted together, creating a permanently connected roadway, or working platform, both lengthways and widthways, for safe loads and vehicles.

The load-bearing capacity of the subsoil is considerably optimised, soil compaction is minimised and damage to the land is avoided. Due to different shaping, partly on both sides, the varioMAT panels are versatile. The flat shaping on one side is particularly suitable for pedestrians, cyclists and wheelchair users, as well as for cars. The strong shaping on the other side ensures optimum traction for heavy vehicles even in difficult terrain. Depending on the size, varioMAT panels can be laid by hand or from a crane truck and ensure safe access right from the start of construction.

Logistics

varioMAT panels are easier to transport than most alternative road mats for temporary use. More panels can therefore be loaded onto a truck or into a container, reducing transport costs.

Innovative ground protection

We develop and manufacture products, such as mobile construction road systems, which are state of the art and convince with their unique properties.

Our temporary ground protection panels and mobile construction roads are used, for example, in structural and civil engineering, for earthworks and at outdoor events. We provide cost-effective solutions designed for constantly changing and demanding conditions. Temporary accesses and driveways as well as ground protection elements are our speciality. Therefore, we can advise you on how to make optimal use of the existing ground conditions, so that you do not have to deal with project delays or additional costs.

We can help you meet your strategic business objectives, avoid environmental damage, as well as save time and cut project costs.

No matter what project you are planning, our products such as temporary roads, access roads and mobile construction roads can be laid easily and quickly.

For more information, please get in touch with our contact person for your region.
